

How To Get A Facebook App ID

Create A New Facebook App

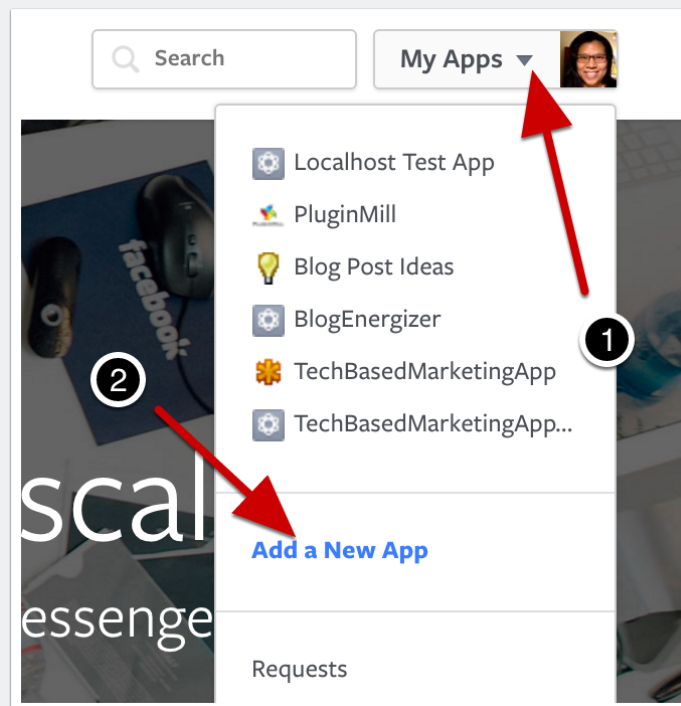

In order to use the plugin, a Facebook App ID is required. To obtain an app ID, you must create a Facebook App. While logged into your account, go to Facebook Developers Website at <https://developers.facebook.com>

How To Get A Facebook App ID

Create A New App

Click the My Apps dropdown in the menu. Click Add a New App

How To Get A Facebook App ID

Enter App Details

1. In the Display Name, enter a name for your app. It can be anything such as MyWebsite Apps.
2. Next, choose a category from the drop down.
3. Click Create App

The screenshot shows the 'Create a New App ID' form. It has a title 'Create a New App ID' and a subtitle 'Get started integrating Facebook into your app or website'. The form contains three main input fields: 'Display Name' (with the text 'App Tutorial'), 'Contact Email' (with a blurred email address), and 'Category' (with a dropdown menu showing 'Choose a Category'). At the bottom, there is a checkbox for 'By proceeding, you agree to the Facebook Platform Policies' and two buttons: 'Cancel' and 'Create App ID'. Three numbered circles (1, 2, 3) with red arrows point to the 'Display Name' field, the 'Contact Email' field, and the 'Create App ID' button respectively.

Authorize Your Website

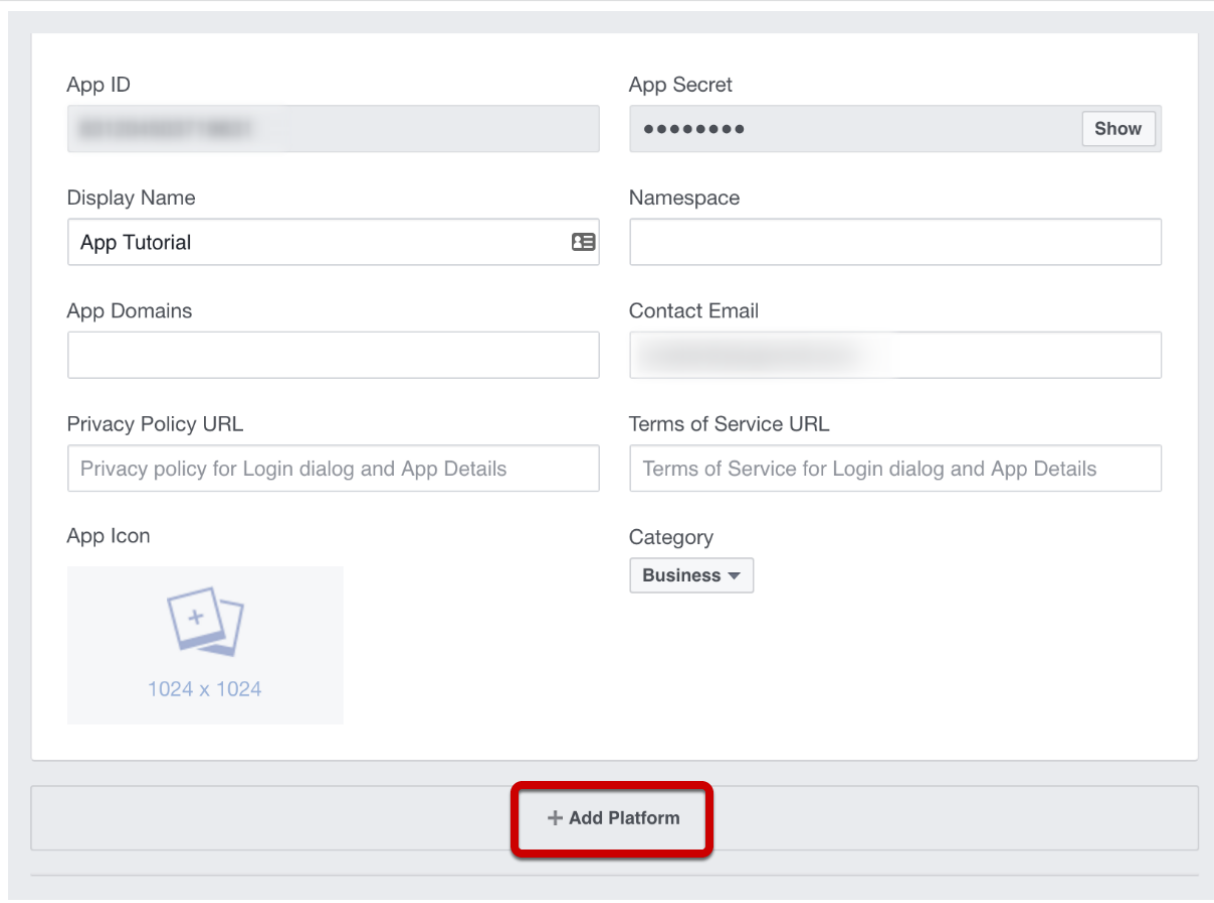

Next, you need to authorize your website to use this app. Click on Settings.

How To Get A Facebook App ID

Add Platform

Click the Add Platform button

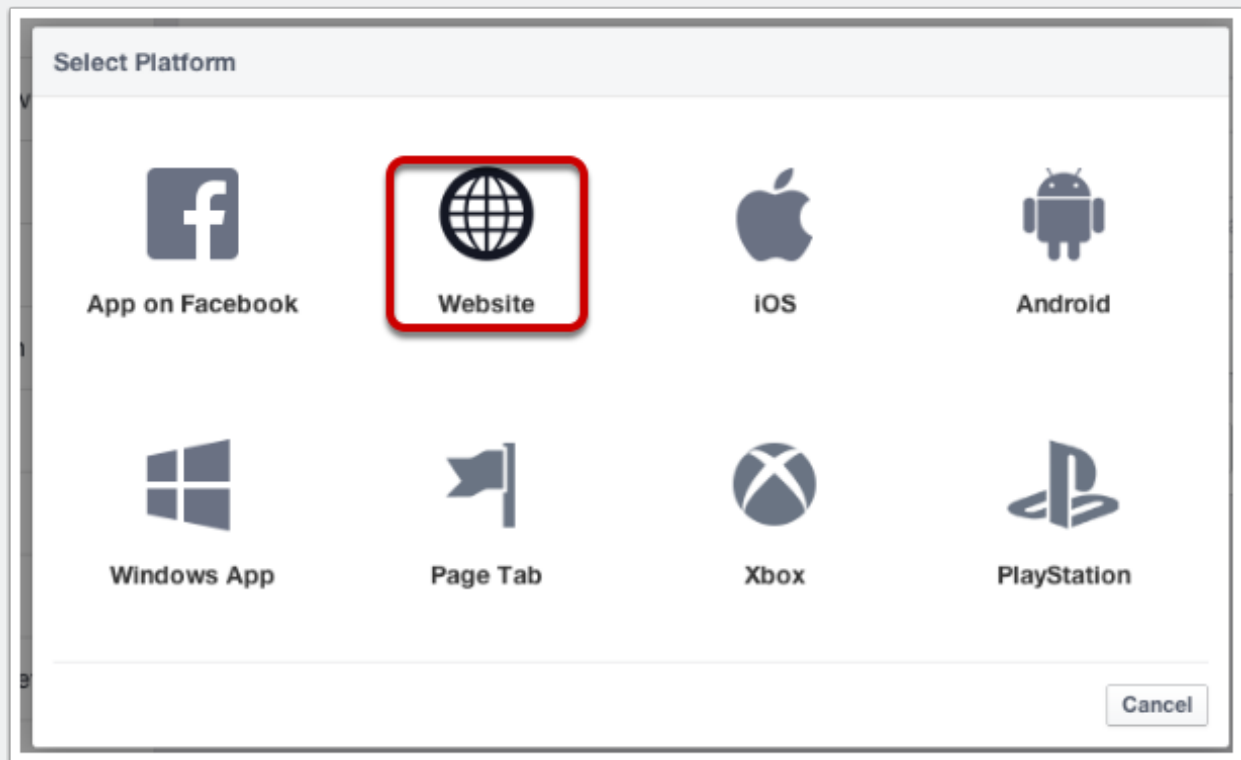

The screenshot displays the Facebook App Settings interface. At the top, there are fields for 'App ID' and 'App Secret'. The 'App Secret' field is masked with dots and has a 'Show' button. Below these are fields for 'Display Name' (containing 'App Tutorial'), 'Namespace', 'App Domains', 'Contact Email', 'Privacy Policy URL' (with a placeholder 'Privacy policy for Login dialog and App Details'), and 'Terms of Service URL' (with a placeholder 'Terms of Service for Login dialog and App Details'). The 'App Icon' section shows a placeholder image with a plus sign and the text '1024 x 1024'. The 'Category' dropdown is set to 'Business'. At the bottom, a large button labeled '+ Add Platform' is highlighted with a red rectangular border.

Enter Website URL

In the Site URL field, enter the URL to your website, then Save Changes

The screenshot shows the Facebook App configuration interface. At the top, there is a 'Website' section with a 'Quick Start' button and a close icon. Below this, there is a 'Site URL' field with the text 'http://www.example.com'. A red arrow points to this field, and a circled '1' is next to it. Below the 'Site URL' field, there is a '+ Add Platform' button. A second red arrow points to the 'Save Changes' button at the bottom right, and a circled '2' is next to it. The 'Save Changes' button is blue, and there is a 'Discard' button next to it.
